

- digestive system process
- Muscle contraction
- dicarboxylic acid transport
- Scavenging of heme from plasma
- detection of temperature stimulus
- cellular component morphogenesis
- Transport of small molecules
- generation of precursor metabolites and energy
- piRNA metabolic process
- signaling receptor ligand precursor processing
- Diseases of glycosylation
- glycogen metabolic process
- Basal cell carcinoma
- response to activity
- calcium ion homeostasis
- intermediate filament organization
- behavior
- carbohydrate metabolic process
- neuropeptide signaling pathway
- Calcium signaling pathway
